To the hiring committee

Thank you for the opportunity to apply for the Staff Product Designer, Web Experiences role. I'm excited by the scope of Samsara's operations and the opportunity to deliver success to your customers at scale.

As lead product designer at Mariana Tek, I design projects through research, prototyping, testing, and development. While creating designs and working toward implementation, I sought a deep understanding of a wide range of client and customer needs through research. With that knowledge, I worked closely with stakeholders, clients, and my cross-disciplinary team to deliver outstanding customer features. As a result of this work, the company grew from a small startup serving boutique fitness to being acquired by Xplor, a multinational group with interests throughout the services space.

Additionally, as the CEO and Founder of Typetura, I developed two patented technologies, scaling these technologies to gain standards acceptance into the web platform. It has been thrilling to deliver design value and excellence to companies of all sizes and see them thrive.

I truly enjoy exploring the intricacies of web and product design, thriving in ambiguity and complexity to create scalable solutions. I'm excited about what Samsara is doing with IoT, and as a hobbyist with IoT devices, I would be thrilled to join your team, building amazing products that help your clients accomplish their tasks.

Warm regards,  
Scott Kellum
