To the hiring committee

Thank you for the opportunity to apply for the Principal Product Designer role at Blueprint. I have extensive experience building and iterating on product features in a fast-paced startup environment and working in highly regulated research-driven healthcare industries. I am eager to bring that experience to Blueprint. I sincerely appreciate your commitment to improving mental health care quality, supporting patients and providers with AI tools, and helping providers focus on care.

At Mariana Tek, I led the design of client-facing products. Mariana Tek was a startup serving the boutique fitness industry that I helped scale globally. With this focus on quality and consistency, I led design research and two development teams in creating and implementing features that would drive growth. I took on initiatives like creating a design system that enabled us to increase the velocity of leading research, design, and implementation of numerous product features. I am excited to bring this drive to Blueprint, as I thrive on fast-paced, data-driven teams.

I sincerely appreciate Blueprint's commitment to mental health. My work for Veterans Affairs directly supports over 680 VA Patient Advocates, affecting 8.84 million veterans annually. Making a difference in people's lives fills me with pride, and I see this mission reflected in Blueprint's work.

This role is the perfect fit for my expertise and satisfies a mission that is close to my heart. I would love to bring my passion and drive to make excellent products that enrich people's lives to Blueprint and join your stellar team of innovators in mental healthcare.

Warm regards,
Scott Kellum
