To the hiring committee

Thank you for the opportunity to apply for the Lead UX/UI Designer, E-Commerce role at Quince. I have extensive experience creating and maintaining design systems and design quality in a fast-paced startup environment, and I am eager to bring that experience to Quince. I deeply appreciate Quince's commitment to quality and value for your customers, and I am committed to bringing that high bar of quality to your online shopping experience.

At Mariana Tek, I led the design of client-facing products. Mariana Tek was a startup serving the boutique fitness industry. I helped them scale to deliver high-quality experiences globally. With this focus on quality and consistency, I led design research and two development teams in creating and implementing features that would drive customer value. Identifying the need for a design system to achieve our goals, I created and successfully rolled out an implementation plan, getting incremental updates to our customers and achieving our growth goals. This work resulted in successfully scaling to a global market and selling to Xplor. I'm excited to bring this passion for quality, customer centricity, and growth to Quince. It's clear you share this passion, and that alignment of goals is what draws me to apply for this position.

Warm regards,
Scott Kellum
