To the hiring committee

Thank you for the opportunity to apply for the role of Principal Product Designer, Ads Platform at Reddit. I have extensive experience creating innovative ad products and driving profitability at scale, and I am eager to bring that expertise to Reddit. I understand monetization is fundamental to community sustainability, and I aim to leverage my leadership in this area to help Reddit's communities thrive.

At Vox Media, I took the initiative to create a new high-impact ad product that revolutionized the company's business and led to the Concert ad platform. As a principal product designer, I continued to lead the design of revenue products, helping to scale Concert to over 80 partners, reach over 90% of the online audience in the U.S., and drive over \$200M YoY in revenue. I achieved this by scaling the platform and diversifying our product catalog, empowering our clients and internal teams to work more efficiently with client creative.

I'm profoundly impressed with the community of communities Reddit has built. There is an immense amount of value in Reddit as a platform, and I am excited to work within Reddit to channel that value into revenue streams that are sustainable and trustworthy for the communities you serve.

Warm regards,
Scott Kellum
