To the hiring committee

Thank you for the opportunity to apply for the Staff Product Designer, Gusto Pro role. I'm excited to dig deep into the research behind what success looks like for your clients, embrace the complexity, and identify opportunities for them.

As lead product designer at Mariana Tek, I design projects through research, prototyping, testing, and development. While creating designs and working toward implementation, I sought a deep understanding of a wide range of client and customer needs through research. With that knowledge, I worked closely with stakeholders, clients, and my cross-disciplinary team to deliver outstanding customer features. As a result of this work, the company grew from a small startup serving boutique fitness to being acquired by Xplor, a multinational group with interests throughout the services space.

I genuinely love delving into the details of product design, thriving in ambiguity and complexity. I admire what Gusto does to simplify HR challenges for many businesses. Achieving simplicity is difficult, and I would be excited to collaborate with your talented team that consistently tackles this challenging work.

Warm regards,
Scott Kellum
